PROVISION OF A BACK-UP SERVER FOR THE E-PERMITTING SYSTEM

E-permitting

COMPLETED

Improvement of the electronic system for the issuance of building permits through the provision of a back-up server, which will enhance its stability and availability for over 6,500 users that benefit from it every day. Server and network equipment were procured through the project, as well as necessary licences. The aim of this activity was to contribute to the creation of a more favourable business environment by improving the efficiency and transparency of the e-government and, ultimately, to new investments. At the same time, citizens' trust in institutions, as well as the quality of services that are being offered through the e-government will also be enhanced.

GIS FOR BETTER LAND MANAGEMENT AND VALORISATION OF SOCIOECONOMIC POTENTIAL OF THE ČAJETINA MUNICIPALITY

Introduction and Development of GIS

COMPLETED

Municipality of Čajetina will upgrade its current GIS with the planning documents, the cadastre of underground installations and basic services and the protocols for the information exchange. As Zlatibor Tourist Centre and its natural potential are attracting a growing number of investments especially in the construction sector the project will enable efficient response mechanisms to address the increasing number of permit requests and resolving the legalisation cases.
